| Total | \$ 198,584.00 |
|-------|---------------|

\* Re-Training Sessions will be \$231.75 per session

|  |    |        |
|--|----|--------|
| Customization and Enhancements (Not Evaluated) |    |        |
| Hourly rate                                    | \$ | 150.00 |

Table 5

The Contractor shall agree to provide to DHS, at DHS option, up to an additional sixty (60) complete Live Scan fingerprinting stations, including all necessary equipment, hardware and software, at any time during the contracted term and at the same purchase price specified by Contractor on the Bid Price Sheet.

# Price Justification

## Company History:

Automation Designs & Solutions, Inc. d/b/a AD&S, Inc. was founded in 1989 for the purpose of bringing the world of technology and electronic records into the arena of law enforcement. The goal was to take personal computers and develop systems that would create forever records for reference. the company set its mission as the following:

“At AD&S, our mission is to honor and defend the vulnerable and helpless through the implementation of state and FBI criminal history background checks, OPM background checks, TSC and SWFT systems utilizing fingerprint technologies. we will continually communicate with, and learn from, our customers to improve our products and services. We will keep on top of today's and tomorrow's technology, no matter how fast it moves, to ensure our customers always have the best tools available to them.”

We are certified as a WOSB company and provide systems throughout 33 states plus Washington D.C., the Virgin Islands, and the U. S. Ambassador's office in Santiago, Chile. Within our home state of Mississippi, we have placed 28 palm systems in law enforcement offices, regional correctional centers, police departments, and have even placed multiple tenprint livescan systems in police departments over the state. The company represents one of the only three or so biometric companies in the southeastern United States.

in addition to law enforcement, our market expanded fifteen years ago to the civil arena where we have placed systems that function for every healthcare and childcare facility in the State of Mississippi, in addition to 17 state agencies and 85 school districts. Our systems transmit for the Division of Medicaid, DOD contractors, OPM, TSC, and USCIS.

We have onsite staff of nine personnel plus multiple contractors and developers throughout areas in the United States. Their degrees are in multiple areas of Computer Science, IT, AI and other diverse talents that bring together a team unmatched.

AD&S, Inc., a private, for profit, business, has been in business thirty (30) years. It is a small business, 100% woman-owned and certified as such by SBA as WOSB. Its software product, FingerPro ID is owned by and copyrighted solely to AD&S, Inc.

The company and its employees/contractors, are CJIS certified operating corporate offices in the State of Mississippi. We currently have systems installed in 33 states plus Washington, D.C., U. S. Virgin Islands and the Ambassador's Office in Santiago, Chile.

AD&S attends all FBI Compact Council meetings in order to stay abreast of any and all changes related to the FBI and ensure compliance with all standards and policies.

FingerPro ID is certified by the FBI for use with multiple brands of live scans and palm scanners. Our WSQ (Wavelet Sequential Quantization) algorithms, as well as our printing algorithm have also been approved by the FBI. We have all required certifications to transmit to multiple states and the FBI, plus OPM and NIGC (National Indian Gaming Commission).

AD&S, Inc. is responsible for all of its product support as well as warranty replacement units due to malfunction, excluding user abuse.

Our company currently markets and supports the Dactyscan and Multi-scan live scan systems from Green Bit Americas, Inc. Related software is copyrighted to AD&S which handles all related technical and software support. Copies of the related certifications with the State of Mississippi Criminal History Division (MCIC) and the FBI are attached to and included herewith. The company accommodates custom interfaces as necessary to various entities. Our staff includes a team of fingerprint capture specialists who are well versed in CJIS requirements and forms required when capturing fingerprints that are electronically transmitted to the State and the FBI.

The company provides systems for the Mississippi DHS where workstations with FingerPro ID Software and livescans are placed throughout the State for capture and transmission of fingerprints for criminal history background checks.

AD&S has been under contract with the MS State Department of Health (MSDH) for eighteen (18) years for electronic submission of applicant fingerprints to the MCIC/FBI CJIS Division responsible first for all childcare facilities within the State of Mississippi and with all licensed healthcare facilities in the State of Mississippi. Approximately 70,000 sets of fingerprints are

transmitted annually through the FingerPro ID System installed at this State agency.

Fingerprints for approximately 3,000 to 4,000 provider facilities are processed through this agency. While we have a continuum of service in these areas, the contract for these services are renewed every five years.

AD&S has successfully implemented and trained its systems in eighty-two (82) of the Public School Districts of the State of Mississippi which covers fingerprint background checks for all employees, contractors, and volunteers of the schools.

We have also provided a fingerprint capture specialist to travel to all colleges and universities throughout the State to capture prints of those applying for various nursing degrees through the MS State Board of Nursing. Our company currently is under contract for the capture and transmission of the fingerprints for criminal history background checks of all High Risk Providers of the Mississippi Division of Medicaid.

AD&S has had the opportunity to place systems in-house at the University of Mississippi Medical Center with customization to meet the needs of interfacing to Mainframe systems there. UMMC is noted for the first heart transplant in the world and most recently for a heart and lung transplant on one patient.

**\*Note: With agencies such as the MS State Department of Health and the Mississippi Department of Human Services, the size and regulations often prevent them from providing written references. However, here are two main contacts for each of these agencies who actively utilize FingerPro ID.**

## **FingerPro ID Electronic Fingerprint Transmission System**

The user-friendly features of FingerPro ID software include, but are not limited to the following:

**Card Reader Integration** – Our (optional) card reader can quickly and easily capture demographic information from any government-issued ID. This improves record creation and data entry time, while reducing the likelihood of data capture errors and incorrect information being sent with fingerprint records.

**Data Entry Validation** – FingerPro ID performs validation on data entered into a fingerprint record and notifies the user of any issues in real time, allowing the user to correct any such errors before they cause problems in transmission.

**Record feedback** – Users can see the processing status of all records at a glance, quickly identifying which records may be ‘stuck’ in a particular stage and need further attention.

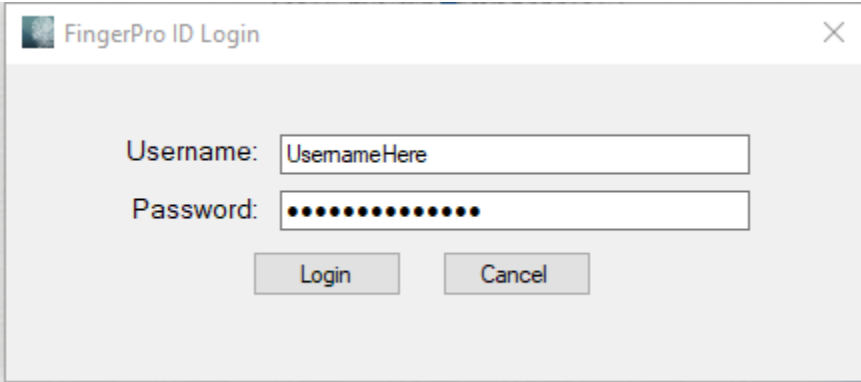

**Advanced search capability** – nearly any part of a record can be used as the criteria for a search; makes the correct record easy to find.

**Automatic quality evaluation** – FingerPro ID evaluates the image quality of fingerprints captured in real time, and provides feedback on any prints that might need to be retaken. These corrections can be made as many times as necessary to ensure successful transmission.

**Fingerprint record replication** – Create a new record with the same (or updated!) demographic information, scan new fingerprints, and send the new record quicker than having to ‘start from scratch’.

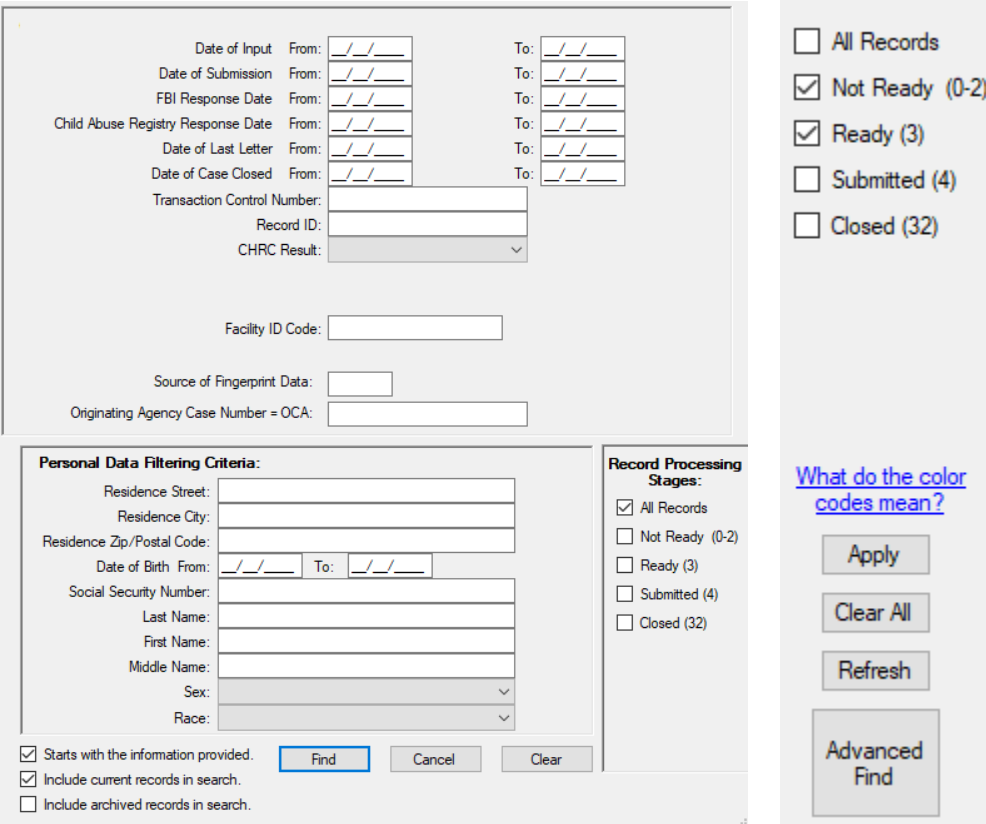

**Automation** – FingerPro ID can automate many of the common tasks that would normally require user input, allowing for a seamless workflow process that can scale up as needed. Automated tasks include: Data backup/encryption, Store-and-Forward server operations, fingerprint record transmissions, response record downloading and association, and card/response printing

FingerPro ID has a secure login that follows the strict FBI guidelines and regulations to minimize security breaches.

The image shows a login window titled "FingerPro ID Login". It contains two input fields: "Username:" with the placeholder text "UsernameHere" and "Password:" with masked characters (dots). Below the fields are two buttons: "Login" and "Cancel".

It features an extensive but easy-to-use record search system that allows you to find records quickly.

The image displays a record search system interface. It includes a main search area with various filters and a sidebar with additional options.

**Main Search Area:**

- Date of Input: From: [ ] To: [ ]
- Date of Submission: From: [ ] To: [ ]
- FBI Response Date: From: [ ] To: [ ]
- Child Abuse Registry Response Date: From: [ ] To: [ ]
- Date of Last Letter: From: [ ] To: [ ]
- Date of Case Closed: From: [ ] To: [ ]
- Transaction Control Number: [ ]
- Record ID: [ ]
- CHRC Result: [ ]
- Facility ID Code: [ ]
- Source of Fingerprint Data: [ ]
- Originating Agency Case Number = OCA: [ ]

**Personal Data Filtering Criteria:**

- Residence Street: [ ]
- Residence City: [ ]
- Residence Zip/Postal Code: [ ]
- Date of Birth: From: [ ] To: [ ]
- Social Security Number: [ ]
- Last Name: [ ]
- First Name: [ ]
- Middle Name: [ ]
- Sex: [ ]
- Race: [ ]

**Record Processing Stages:**

- ☒ All Records
- ☐ Not Ready (0-2)
- ☐ Ready (3)
- ☐ Submitted (4)
- ☐ Closed (32)

**Search Options:**

- ☒ Starts with the information provided.
- ☒ Include current records in search.
- ☐ Include archived records in search.

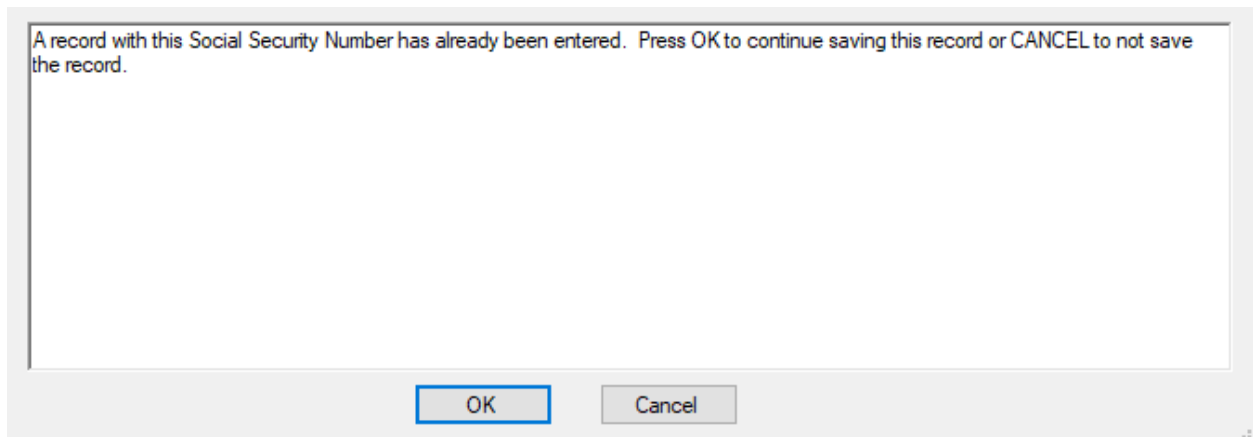

**Buttons:** Find, Cancel, Clear, Apply, Clear All, Refresh, Advanced Find.

**Link:** [What do the color codes mean?](#)

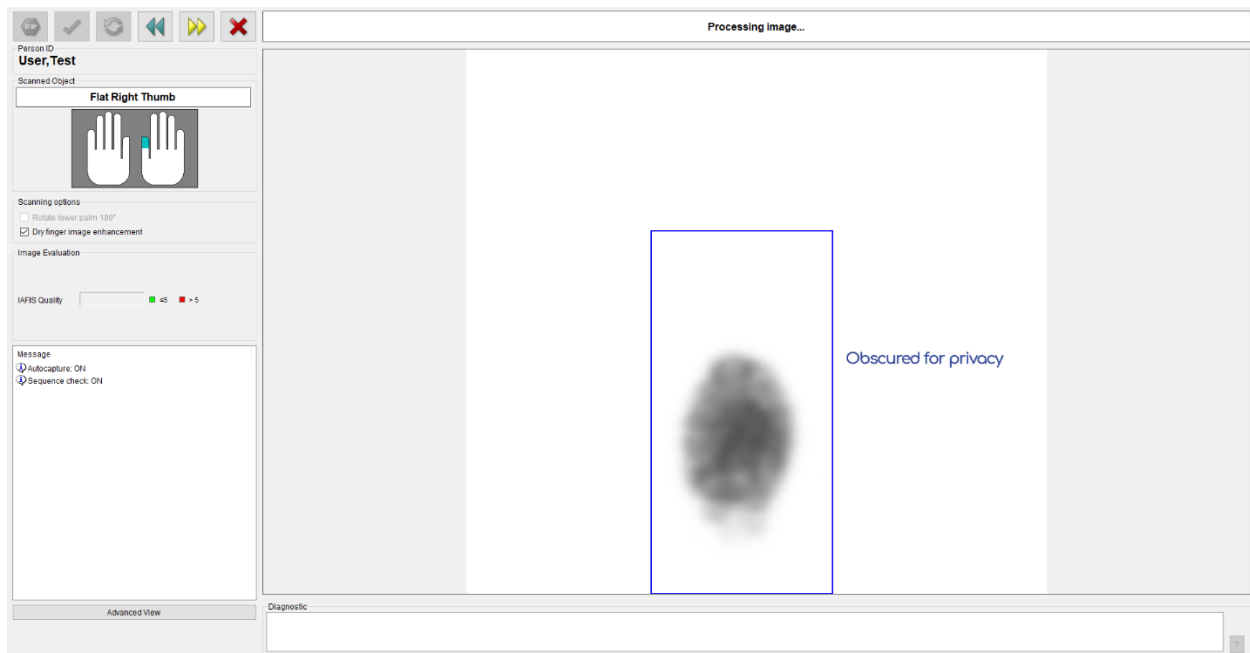

You can create new records with just a click of the button.

FingerPro ID implements a feature to alert you of when a social security number is already present in your database so you can better keep track of who is coming through your system.

The scanning screen helps you to keep track of who it is that you're scanning and what finger it is that you're scanning.

It will also alert you if you accidentally scan the wrong finger by cross-matching the slaps to the rolls!

The alert is:

**Sequence check: low matching score.  
Please, check the requested object.**

We have our own backup program with encryption to ensure that your data is always safe and accessible.

With record staging such as “Ready”, “Submitted”, and “Incomplete”, knowing the state of your record is made simple.

| Record stage |                        |           |            |            |                 |    |             |                                   |
|--------------|------------------------|-----------|------------|------------|-----------------|----|-------------|-----------------------------------|
|              | Input Date             | Record ID | ->         | Full Name  | Submission Date | FP | Date Closed | TCN ( Transaction control number) |
| ▶            | 06/17/2016 11:44:05 AM | 00001431  | NR Text    | Doe,Johnny |                 |    |             | 00000000000000000000              |
|              | 08/04/2016 12:01:23 PM | 00001583  | Incomplete | Doe,John   |                 |    |             | 00000000000000000000              |
|              | 09/24/2018 03:21:20 PM | 00001974  | Ready      | User,Test  |                 |    |             | 00000000000000000000              |

FingerPro ID is an intuitive, user friendly, and extensive system that costs less than all the others without the sacrifice of functionalit

## Proposed Livescan

### DactyScan 84c

The Dactyscan84c is a compact and FBI app. F certified 10-print livescan in full compliance with the “10-print capture scanner & software User group requirements” suitable for all applications in need of 4-slaps and rolled acquisition. A user interface based on 12 LEDs facilitates the acquisition procedure by indicating the fingerprint(s) to be acquired and providing quality feedback. Main applications are e-ID document enrolment, Voter registration and criminal background checks.

#### Scanner Specifications

|                                      |  |
